

DATA NETWORKING & INTERNET SOLUTIONS

BIGGER BANDWIDTH, BETTER RELIABILITY

Demand More from Your Network

Enterprise businesses are demanding more bandwidth and better network connectivity than ever before. To keep pace in today's environment, you need reliable data and networking solutions wherever you do business. Your employees expect consistent connectivity whether they are at company headquarters or working from a remote location.

Electric Lightwave understands one size does not fit all data and networking needs. We offer flexible services for all business sizes, partnering with you to find the right solution for your business.

The Right Network Makes the Difference

Electric Lightwave draws from a growing portfolio of advanced services to tailor data and networking solutions to your business needs. Our reliable, secure fiber network provides a foundation for the scalability and reliability required to empower your mission-critical applications. Expert network services professionals work with you find the right combination of services to match your complex business needs.

Electric Lightwave has a full menu of services necessary to build the right data and networking solution for your business. We provide scalable data access using a variety of technologies including Ethernet Services, Wavelength Services, and IP/MPLS VPN Solutions.

PRODUCTS AND SERVICES

- + **Ethernet Services** – Maximize network efficiency using scalable bandwidth and prioritized traffic with Quality of Service (QoS) technology.
E-Line connects your remote offices to your main location with either a point-to-point or a hub and spoke configuration.
E-LAN extends your existing network with multipoint-to-multipoint connectivity.
- + **IP/MPLS VPN Solutions** – Save time and money converging voice and data onto a single network connection.
- + **High Speed Internet** – Build the right solution for your needs with bandwidth available from 1.44 Mbps to 10 Gbps.
- + **Wavelength Services** – Expand your network without up-front capital expenditure.
- + **Dark Fiber** – Tap into virtually unlimited bandwidth with this cost effective solution.

The Right Networking Solutions

Electric Lightwave offers a full menu of enterprise-class services that help you reduce costs, optimize your network investment, and protect vital data. We tailor the right combination of services to meet your unique business needs.

- **Gain flexibility and scalability** with Electric Lightwave Ethernet Services. We offer bandwidth speeds from 1.5 Mbps to 10 Gbps meaning you pay only for what you need when you need it.
- **Harness the power of convergence** with Electric Lightwave IP/MPLS VPN Solutions. Simplify your network services and reduce costs by combining voice, data, and Internet traffic over a single connection.
- **Rely on Service Level Agreements (SLAs)** that guarantee uptime, latency, and packet delivery.
- **Ensure dedicated point-to-point connectivity** with Wavelength Services. Your mission-critical applications and data never leave the safety of our robust fiber network. Improve business continuity and disaster recovery preparedness without upfront capital expense.
- **Take control of your network** with Electric Lightwave Dark Fiber. Expand your capacity for high bandwidth applications. Diversify routing to ensure uninterrupted connectivity. Tap into up to 400 Gbps with a single strand of Dark Fiber.

Electric Lightwave provides more than just a robust network and carrier-class services. We are a partner you can trust to help you meet your data and networking needs now and into the future.

The Right Data & Networking Solutions

At Electric Lightwave, we strive to be more than your communications service vendor. Our team of dedicated experts works to understand your needs and anticipate changes. By becoming your strategic partner, Electric Lightwave helps you plan for future data and networking needs while optimizing your current services.

Electric Lightwave is committed to smooth, on-time service delivery. Our dedicated service managers work closely with you to understand your business needs. They coordinate provisioning and installation teams to fit your operation.
