ELECTRIC LIGHTWAVE™

POWERING THE FUTURE OF HEALTHCARE
FULL SUITE OF NETWORKING SOLUTIONS

Manage Evolving Technology Requirements

The healthcare industry is rapidly changing with hospitals, medical offices, skilled nursing and care facilities, and other healthcare providers adopting new technologies quickly to meet the challenges of new initiatives and regulatory requirements. Electronic Medical Records (EMR), high-resolution imaging files and bandwidth-intensive applications are stretching IT infrastructures while budget constraints place additional pressure on the system. Healthcare providers require secure, reliable connectivity for accessing critical patient information and robust solutions to support business continuity and disaster recovery plans. Electric Lightwave has the expertise and knowledge combined with the largest fiber network in the region to deliver scalable and affordable solutions for the unique needs of healthcare providers.

Secure Access for Critical Information

Whether you have a small clinic or a multi-site medical center, you can rely on our portfolio of flexible Data Networking and Internet services and secure Managed and Cloud services to help you access sensitive patient records and critical information. You can rely on Electric Lightwave's Ethernet Services for defined Service Level Agreements (SLAs) that guarantee uptime for your high bandwidth files and applications. Or simplify data management and prioritize network traffic efficiently with IP/MPLS VPN Solutions. Electric Lightwave also offers business continuity and disaster recovery solutions to keep your information safe and your operations running smoothly.

BUSINESS BENEFITS

+ **Ensure** reliable, secure access to patient records and critical information when you need it most.

+ **Rest easy** with data networking and Internet options that help you comply with regulatory changes.

+ **Safeguard** information and keep operations running smoothly with Electric Lightwave's Business Continuity and Disaster Recovery solutions.

+ **Depend** on guaranteed network uptime with defined SLAs.

+ **Increase efficiency** with Electric Lightwave's creative services and solutions to help you do more with less.

+ **Leverage** Electric Lightwave's dedicated, local healthcare-focused specialists for the expertise you need to meet changing requirements.

+ **Rely** on 24 x7 service from our Network Operations Center.

Maximize Services while Reducing the Cost of Care

Electric Lightwave's creative solutions and services are designed to help you maximize your budget and improve efficiency so that you can do more for less. Leverage Electric Lightwave's expertise and reduce capital expenses with Hosted or Managed Services. Our extensive Managed and Cloud Services portfolio offers a suite of voice, data, and Internet Solutions to support your EMR requirements.

- Combine voice and data service over a single connection with SIP Trunking for a cost-effective communication solution.
- Realize secure powerful communications service without costly on site equipment with Hosted PBX.
- Secure your network with Cloud Firewall Service for unprecedented protection and control.
- Protect your mission-critical equipment in a secure network-rich environment with Electric Lightwave carrier-class colocation services.
- Get cost-effective, dedicated high-speed transport with Wavelength Services — ideal for data center connectivity.

Get the Expertise You Can Trust

Electric Lightwave's highly-trained, dedicated account team understands the unique requirements of healthcare providers. We are ready to help you navigate the rapid changes in HIPAA, the Affordable Care Act and Medicaid Expansion regulations, and position you for the future. Our local team of healthcare-focused specialists will work with you to define a technology roadmap that delivers on your key initiatives, on time and on budget. Electric Lightwave's Network Operations Center (NOC) operates 24 hours per day, 7 days a week — just like most healthcare facilities. Electric Lightwave is a partner you can trust with your technology challenges.
