

## IP/MPLS VPN

### LAYER 3 VPN SOLUTIONS

#### Simply Connect

Streamline connectivity to multiple locations and simplify your network management with an IP/MPLS VPN network. A Virtual Private Network (VPN) combines all of your business communications to a single private, secure network connection—giving you the confidence to share critical business information and applications with all your offices.

#### Secure Networking

Electric Lightwave's IP/MPLS VPN is a service that securely connects all of your locations combining voice, data and Internet traffic on a single access circuit. Whether you have two sites or 200, we can customize a secure, reliable solution with bandwidth available up to 10 Gbps, protecting your network investment and saving time and money.

We offer various access methods to provide the right amount of bandwidth for your applications and business functions. Our scalable service supports your expanding business and is designed as a fully meshed network to support the needs of multi-location offices. Our high performance network securely connects all locations over a private IP/MPLS network with 99.99% uptime, ensuring high productivity and minimal disruption.

#### Tailored Solution

We offer two levels of service depending on your requirements for managed router configurations, proactive notification, and reporting. Our basic service package provides multi-site private IP-VPN connectivity, multiple applications routing over the Electric Lightwave MPLS backbone and customer premises router. Our premium service

#### BUSINESS BENEFITS

- + **Enhanced Productivity** – Improve your employee productivity and save internal resources by outsourcing network management to Electric Lightwave.
- + **Easy Network Management** – Simplify the management of complex networks with our premium service package, performance monitoring, and expert support 24 x 7 x 365.
- + **Reliable, Secure Network** – Depend on our service performance with service level guarantees and an extensive network footprint in 11 western states with 99.99% reliability.
- + **Full Service Solution** – Gain flexible bundling opportunities for all of your communication, networking and security solutions with Electric Lightwave's IP/MPLS VPN Solution.

package provides advanced configuration options to meet custom routing needs, enhanced visibility, proactive notification and automated repair initiation—in addition to the components in our basic package. Our services are designed to meet your needs so you can save resources and focus on your core business.

## Enhance Your Network

Choose from additional services to complement our IP/MPLS VPN Solution and connect your enterprise nationwide.

- **Failover Backup** – Provides true diversity for your network by automatically switching your traffic over to a wireless backup or wireline connection during a disruption, without manual intervention.
- **Internet Cyber Security** – Protects your business from online threats by identifying your security vulnerabilities, recommending a solution to meet your individual needs, implementing and maintaining security services.
- **Remote Location Service** – Enables you to leverage a centralized IP-PBX to serve all remote offices and reduce costs associated with multiple, physically dispersed phone systems.
- **Performance Monitoring** – Increase your network visibility with Electric Lightwave’s enhanced portal and view your service utilization.
- **Proactive Notification** – Electric Lightwave automatically notifies you in the event of a Layer 1 or Layer 3 service outage.
- **Custom Solution** – Maximize your network investment with a full service solution and additional services from Electric Lightwave such as Collaboration and Messaging, Hosted Voice Service, SIP Trunking, Cloud Firewall Service, DDoS Mitigation Service, High Speed Internet and more.
