

SECURITY PRO SERVICES

SECURITY & COMPLIANCE CONSULTING FROM A TRUSTED PARTNER

Why Risk Everything?

Breaches from hacking and malware can disrupt your business service delivery—and even put you out of business. The negative effects of cybercrime are tangible and quantifiable: damage to your reputation, fines and penalties, exposure to liability and loss of clients and/or their sensitive information. Shockingly, more than 50% of businesses do not survive a cyber incident. Why risk being one of them?

- 78% of attacks are simple, unsophisticated¹ and preventable.
- 66% of breaches took months or years to discover.²
- 90% of small business fraud could be prevented by simply investing in a basic security program.

Electric Lightwave's Security Pro Services protects your business against cybercrime. We'll help you detect vulnerabilities and recommend an effective course of action.

Protect Your Customer's Private Data

The Payment Card Industry Security Standards Council (PCI SCC) requires all merchants that process, transmit and/or store credit card information to maintain a secure network and protect cardholder data—regardless of transaction volume or size. Do you have the expertise, time and money to research and stay up to date on state privacy laws and regulatory security standards? Electric Lightwave's Security Pro Services can help. Our team of experts will constantly track the complex compliance requirements—letting you focus on running your growing business.

BUSINESS BENEFITS

- + **Breach Prevention** – Avoid most breaches with a vulnerability scan that assesses your level of security.
- + **Defensive Security** – Protect your business at the front line with a well-designed, well-maintained IT security program.
- + **Cost-Effective Solution** – Safeguard your business for a fraction of the cost of a security breach.
- + **Trusted Advisor** – Rely on Electric Lightwave to identify issues and create a plan that mitigates security risks to your business.
- + **Proven Expertise** – Benefit from Electric Lightwave's partnership with RiskSense, a leader in compliance programs that mitigate increasingly sophisticated attacks, while meeting industry requirements.

ABOUT RiskSense® Inc.

RiskSense, Inc. founded in 2006, is a spinoff of New Mexico Tech. The founders, also researchers for NMT's ICASA (one of the world's top research organizations), are recognized as today's premier thought leaders in complex, critical, independent systems and cyber security.

Cost Effective Solution to Protect Your Business

For less than 4% of the cost of a potential incident, Electric Lightwave can help you prevent attacks. First, our team of experts will assess your level of vulnerability and exposure to attacks. Next, based on these findings, we will recommend a proven, customized and cost-effective solution—tailored to fit your situation.

Through a partnership with RiskSense, Inc, an IT Governance, Risk and Compliance firm, Electric Lightwave's Security Pro Services can also assist you with understanding your current compliance posture and the necessary steps to improve compliance.

Our consultant led professional services include:

- **Application Security:** Detects most common web vulnerabilities for sensitive data exposure, privilege escalation and unauthorized data access.
- **Compliance Solutions:** Leverages the power of the Unified Compliance Framework (UCF), automating a portion of the compliance process by covering more than 400 authority documents (NIST, HIPAA, PCI-DSS, etc.).
- **Security Assessment:** Proactively detects vulnerabilities and provides a holistic and succinct assessment of your security posture, risks, attack surface and remediation solutions.
- **Penetration Testing:** Performs adversary-focused, targeted attacks to access privileged accounts, critical systems and sensitive data, laterally, across the enterprise.
- **Forensics and Incident Response:** Conducts in-depth behavioral analysis of suspicious activities and executables for unauthorized data access, exfiltration and breach impact analysis.

Our SaaS offering for assessing security preparedness:

- **RiskSense Platform:** Provides an Intelligent Security & Vulnerability Management Platform focuses on "pre-incident" vulnerability assessment and identification. It is not intended to be an active monitoring system and does not provide post breach analysis.

Fully grasp the scope of your security concerns and challenges—and get a detailed plan to protect your business—with Electric Lightwave's Security Pro Services.

We'll help you develop and implement the right security solution for your unique business needs, backed by our superior support and outstanding customer service. With Electric Lightwave as your single point of contact, your security solution will be simple, targeted and powerful.

Don't let your business be the next cybercrime statistic. Make that small but critically important investment to protect your business and your customers now—before it's too late. Contact Electric Lightwave today.
