WHOLESALE DARK FIBER
SECURE. PRIVATE. COST EFFECTIVE.

Switch On Security, Scalability and Savings

In today's competitive business world, your customers can't afford to wait for expensive network solutions that complicate communications and endanger their bottom line.

Your customers need you to quickly deploy network services, and you need a partner to deliver secure, cost-effective solutions that are simple to manage, easy to control and scale to fit your customers' business growth.

Electric Lightwave's Dark Fiber solution is a cost-effective, easy to deploy option for Carriers, Wireless Providers and Data Centers looking for ways to scale their networks and improve service performance.

You control the design, capacity, optical electronics and protocols of your own dedicated infrastructure, which runs over a physically secure, private network.

BUSINESS BENEFITS

+ **Diverse Routing** for uninterrupted connectivity.

+ **Private, secure networking** for mission critical data.

+ **Flexible connectivity** to more locations.

+ **Rapid installation** and competitive pricing.

Own Your Network. Secure Your Future.

Save time to market, take total ownership of your network and tap into the technology and tremendous business benefits of Electric Lightwave's Dark Fiber solution.

- **Scalability** – Support up to 400 Gbps of Lit transport with a single pair of fiber strand, offering virtually unlimited bandwidth. Open up the potential of 5,000 route miles and 160,000 fiber miles of Electric Lightwave-owned and managed metro and long-haul fiber for exceptional performance, reliability and redundancy.

- **Flexibility** – Leverage existing Electric Lightwave fiber assets to reduce network turn-up time and capture efficiencies. Take advantage of bundling opportunities, including both Lit and Dark Fiber, with lease or Indefeasible Right of Use (IRU) options.

- **Cost Effectiveness** – Grow your network and your bottom line. Translate condensed construction costs and Electric Lightwave's low cost per-bit into higher margins and a stronger ROI for your business.

- **Security** – Take control of the design, capacity, optical equipment and protocols of your own private, physically-secure network. Protect your customer's mission-critical data and applications with dedicated bandwidth.
