

## WHOLESALE PRIVATE LINE

### DEDICATED PRIVATE LINE NETWORKING

#### Worry-Free Data Transfer for Your Customers

Your customer's mission-critical applications and data require fast, secure, reliable transport. Private Networking is critical for connectivity between remote offices, data centers or colocation sites. Your customers depend on worry-free data transfer to stay ahead in today's highly competitive business environment. Electric Lightwave understands your needs, so we provide you with guaranteed and dedicated bandwidth where you need it.

With Electric Lightwave's dedicated, point-to-point TDM, Ethernet and Wavelength private line network services, your clients get the high-speed, reliable and secure connections they need to securely transfer their most sensitive, most important data.

- **Metro Area Networks** – Electric Lightwave owns and operates 35 Metro Area Networks, providing industry leading guaranteed network reliability and availability.
- **Long Haul Network** – Electric Lightwave's extensive long haul network was built to meet your customer's growing demands, offering diverse routes between metropolitan areas.

#### BUSINESS BENEFITS

- + **Reliable, private networking** providing guaranteed network availability and reliability, providing protected connections for mission critical applications, including Internet, voice, data and video traffic.
- + **Metro and long haul private line routes** offer a wide range of connectivity and Integra has an extensive long haul network, enabling a variety of private line options, including TDM private lines, Ethernet private lines and Wavelength Services.
- + **Diverse fiber routes**, owned, managed and operated by Electric Lightwave provide a fiber footprint that transcends traditional routes, resulting in the most efficient possible connections.

## Have Confidence in Your Competitive Edge

Electric Lightwave's scalable point-to-point connections transport traffic over our secure fiber network. Our private line networking services offer the flexibility and scalability of speeds ranging from 1.5 Mbps to 10 Gbps. Ensuring the utmost in security and reliability, we own and manage every inch of the fiber network that carries your customer's information, giving you confidence and bolstered by the following features:

- Service Level Agreement (SLA) with up to 99.999% availability
- Diversely routed, self-healing optical connections
- Low jitter with deterministic performance
- 24 x 7 x 365 network monitoring with self-diagnostic capability
- Speeds ranging from DS-1 (1.5 Mbps) to OC-192 (10 Gbps)
- Carrier-class Ethernet over SONET interface options

Feature for feature, you can trust Electric Lightwave's network to deliver a high quality service to your customers. And beyond the technical specifications, you can trust our dedicated team of Wholesale experts to help you determine the right platform and bandwidth for your customer's needs.
