

WHOLESALE WAVELENGTH SERVICES

METRO & LONG HAUL PRIVATE NETWORKING

More Bandwidth for Your Budget

As your customers' applications consume more and more bandwidth, you must find ways to accommodate the demand without compromising their budget. Your network must transport multiple gigabits of data between large enterprise offices, in addition to providing backup to disaster recovery centers.

To meet these market demands at an affordable cost, turn to Electric Lightwave for optical wavelength services as an ideal, cost-effective solution to achieve the following goals:

- Business continuity and disaster recovery
- Ethernet transport and optical storage
- Data center connectivity

Affordable, Flexible, Powerful Connectivity

- **Cost-Effective Network Expansion** – With zero upfront capital expenditures, you can expand your backbone network and offer your customers the benefits of business continuity and disaster recovery, Ethernet transport, optical storage, and data center connectivity.
- **Dedicated, High-Performance Private Service** – Backed by our industry-leading service agreements, with 99.9% uptime, your customers will experience low latency and guaranteed reliable transport over our carrier-class equipment and network infrastructure.

BUSINESS BENEFITS

- + **Dedicated, private network** reduces privacy and security concerns.
- + **Dense Wave Division Multiplexing (DWDM)** technology provides scalable bandwidth options.
- + **Unique metropolitan fiber footprint** delivers network capacity where you need it.
- + **Low latency** over carrier class equipment and network infrastructure guarantees fast, reliable transport.
- + **Industry leading service agreements** over carrier class equipment and network infrastructure guarantees fast, reliable transport.

- **Flexible Connectivity** – Scalable (1, 2.5 and 10 Gbps) bandwidth options provide you with flexible, cost-effective capacity and seamless network expansion, made possible by our unique metropolitan and long haul fiber footprint.

Additional Benefits

- Our experienced Electric Lightwave network design team will work with you in a collaborative approach, ensuring that your network meets your unique needs.
- Rely on Electric Lightwave's Network Operations Center for 24 x 7 monitoring, network alarm fault management and surveillance.

Leading Product Details

- Fully managed, point-to-point optical wavelength service
- Ethernet interface options: 1 GbE, 10 GbE WANPHY/LANPHY
- SONET interface options: 2.5 Gb, 10 Gb
- OTN interface options: OTU 1, OTU 2
- Long haul and Metro connectivity available

ABOUT ELECTRIC LIGHTWAVE™

Electric Lightwave™, an Integra company, serves as a trusted network infrastructure partner to enterprises, government agencies and carriers in select markets throughout the western United States. We combine dense metro and intercity fiber assets, enterprise-grade network solutions, including Ethernet, Wavelengths and IP, with a highly responsive and easy to do business with approach. Electric Lightwave offers a premium service experience to match our premium network infrastructure solutions.
