

IP/MPLS VPN

YOUR LAYER 3 VPN SOLUTIONS

Simply Connect

Efficiently connecting multiple branches of your government agency with a central network to facilitate communications and data access that is indispensable to speeding transactions, managing operations and pleasing customers. Until recently, choices facing IT managers were largely limited to wide area networks (WANs) based on private lines; however, these systems can be costly and complicated to implement and maintain.

Unified, Secure Communications

As a result, IP/MPLS VPN networks have become a popular option for government agencies seeking to connect their offices at minimal costs, while realizing unified communications, simplified network architecture and easy management.

Now you can connect all of your locations with Electric Lightwave's IP/MPLS VPN solutions, and enjoy the simplicity of combining voice, data and Internet traffic over a single network. Whether you have two sites or 200, we can customize a secure, reliable solution in bandwidths up to 10 Gbps, protecting your network investment and saving time and money.

Architecture Built to Scale (Voice/Data)

Support your agency with a networking foundation that allows you to grow, on-demand, with multiple service types: Voice, Data, and Internet. Our scalable platform can be designed as a fully meshed network to support the needs of multi-location offices.

BUSINESS BENEFITS

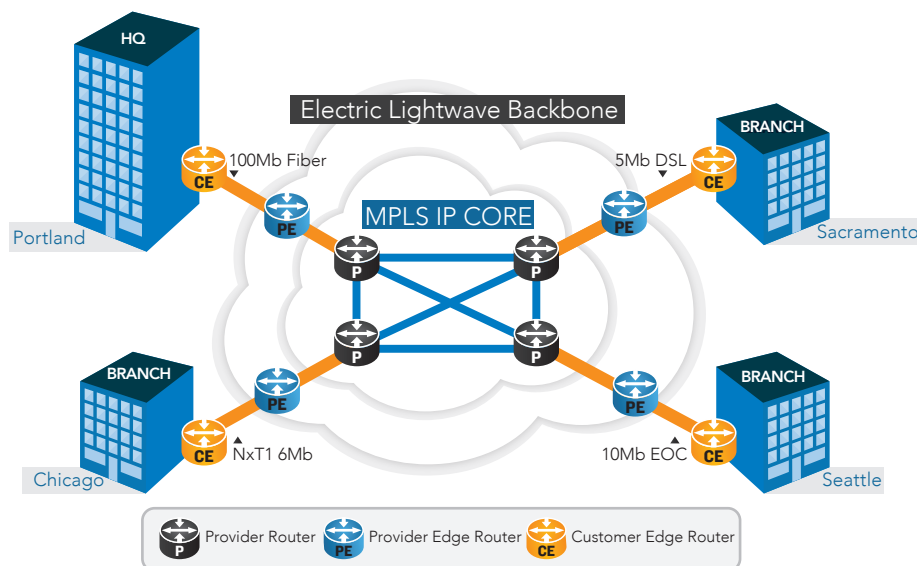

- + **Consolidate your network** by converging multiple network protocols and traffic types into a single connection
- + **Easily designate priority** for each traffic type with flexible Quality of Service (QoS) options
- + **Change your network configuration** or your upgrade bandwidth with minimal expense and effort
- + **Eliminate costs** for supporting multiple types of equipment required for legacy networks
- + **Streamline network management** with performance reports and 24 x 7 proactive monitoring and support
- + **Guarantee network access** with industry-leading Service Level Agreements (SLAs)

Depend on Electric Lightwave— Focus on Your Constituents

You need to bring the right people together at the right time, regardless of location. Electric Lightwave can help you seamlessly and reliably connect your people, empowering them to focus on government business. Our high performance network securely connects all locations over a private IP/MPLS Network, ensuring high productivity and minimal disruption.

Flexible Bandwidth and Access Options

You can't afford to skimp on bandwidth, and you can't afford to waste it where it's not needed, either. We offer various access technologies to provide just the right amount of bandwidth for your applications and
