

PRIVATE LINE

DEDICATED PRIVATE LINE NETWORKING

Worry-Free Data Transfer

Your mission-critical applications and data require fast, secure, reliable transport. Enterprises with multiple locations, high bandwidth requirements, and zero tolerance for service performance issues require a high-speed dedicated solution. Private Networking is critical for connectivity between remote offices, data centers or colocation sites. You depend on worry-free data transfer to stay ahead in today's highly competitive business environment. Electric Lightwave understands your needs, so we provide you with guaranteed and dedicated bandwidth where you need it.

With Electric Lightwave dedicated, point-to-point TDM, Ethernet and Wavelength private line network services, your clients get the high-speed, reliable and secure connections they need to securely transfer their most sensitive, most important data.

- **Metro Area Networks** – Electric Lightwave owns and operates 35 Metro Area Networks, providing industry leading guaranteed network reliability and availability
- **Long Haul Network** – Electric Lightwave's extensive long haul network was built to meet your growing demands, offering diverse routes between metropolitan areas.

BUSINESS BENEFITS

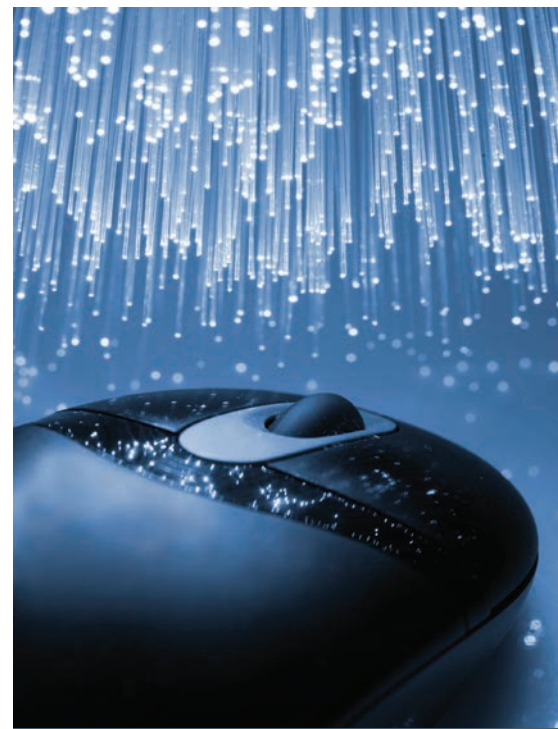

- + **Reliable, private networking** leads the industry in guaranteed network availability and reliability, providing protected connections for mission critical applications, including Internet, voice, data and video traffic.
- + **Flexible metro and long haul private line options** offer a wide range of connectivity. Electric Lightwave has an extensive long haul network, enabling a variety of private line options, including TDM private lines, Ethernet private lines and Wavelength Services.
- + **Diverse fiber routes**, owned, managed and operated by Electric Lightwave provide a fiber footprint that transcends traditional routes, resulting in the most efficient possible connections.

Have Confidence in Your Connection

Electric Lightwave's scalable point-to-point connections transport traffic over our secure fiber network. Our private line networking services offer the flexibility and scalability of speeds ranging from 1.5 Mbps to 10 Gbps. Ensuring the utmost in security and reliability, we own and manage every inch of the fiber network that carries your information, giving you confidence and bolstered by the following features:

- Integrated data network to connect your office locations and employees
- Industry leading Service Level Agreement (SLA) with up to 99.999% availability
- Diversely routed, self-healing optical connections
- Low jitter with deterministic performance
- 24 x 7 x 365 network monitoring with self-diagnostic capability
- Speeds ranging from DS-1 (1.5 Mbps) to OC-192 (10 Gbps)
- Carrier-class Ethernet over SONET interface options

Feature for feature, you can trust Electric Lightwave's private line network services. And beyond the technical specifications, you can trust our dedicated team of experts to help you determine the right platform and bandwidth for your needs.
